

Introducing **Collagenex**, a revolutionary **biotechnological skin booster** designed to restore youthful glow, firmness, and structure from within the dermal environment. Unique to the market, Collagenex harnesses **Human-Identical RH-Collagen (Types I & III)** to support **fibroblast activity, extracellular matrix (ECM) integrity, and skin resilience,**

What Makes Collagenex Special

Human-Identical RH-Collagen (Types I & III)

- **Type I Collagen:** Reinforces skin structure and firmness.
- **Type III Collagen:** Enhances elasticity and flexibility.
- **RH (Recombinant Human)** technology ensures a **non-animal, ethical, and biocompatible** formula for optimal safety.

Key Benefits of RH-Collagen

Biocompatible & Safe — Recognized naturally by the body with minimal risk of irritation.

Anti-Aging Powerhouse — Firms, smooths, and deeply hydrates the skin.

Ethical Innovation — 100% vegan and sustainably produced.

Advanced Regeneration — promotes fibroblast activity associated with collagen production.

Pure Quality — Lab-controlled production guarantees consistency and purity in every dose.

Advanced Regenerative Complex

Dual Collagen Support – Type I & III collagen support dermal structure and elasticity

Hydration Enhancement – HA supports skin plumpness and comfort

Cellular Regeneration Support – PN enhances skin recovery and

renewal processes

ECM Support – Promotes dermal density and resilience over time

Dual-Phase Rejuvenation Technology

Immediate Effect: Hyaluronic Acid delivers instant hydration and volume (lasting 1–2 months).

Long-Term Effect: Recombinant Collagen sustains firmness, elasticity, and skin remodeling for biological remodelling over time.

Treatment Protocol

- **Initial:** 3 sessions, 2 weeks apart
- **Maintenance:** 1 session every 4–6 months

Treatment Areas: Face | Under Eyes | Neck | Décolleté | Hands

Collagenex Key Ingredients

RH-Collagen Type I – 3mg/ml (7.5 mg / 2.5 ml) – Supports dermal structure, firmness, and tensile strength.

RH-Collagen Type III – 3mg/ml (7.5 mg / 2.5 ml) – Supports elasticity, flexibility, and youthful skin texture.

High-Molecular Hyaluronic Acid – 20mg/ml (50 mg / 2.5 ml) – Provides deep hydration, immediate skin smoothing, and matrix support.

Polynucleotide – 2mg/ml (5 mg / 2.5 ml) – Supports tissue regeneration, skin recovery, and overall skin tone quality
